

PC-ACE Pro32 Update Instructions

*****Important: Please make a backup of your PC-ACE Pro32 files before applying the update.**

Downloading from the Internet:

1. Click on "Download the PC-ACE Pro32 update"
2. Save this file to the Desktop (select Desktop in the "Save In" window) or can save to another location of your choice.
3. Locate the ppaceupdate.zip file and click to bring up the Winzip screen—be sure winzip opens with Winzip Classic.
4. Extract the ppaceup.exe file (extract icon found on the winzip toolbar) to the desktop or another location of your choice.
5. Locate the ppaceup.exe file and click to begin the installation of the update.
6. Follow the on-screen wizard steps to complete the update.

Password for update installation is: bcbsks1

If using extraction software other than winzip, the steps outlined above could be different.

To verify the update has been applied: From the PC-ACE Pro32 toolbar, click on **Help**, then click on **About PC-Ace Pro32**. The version should show as **2.34.0.100**

The software is updated every quarter. It is important to update to assure you have the most current diagnosis codes, procedure codes and any new software enhancements available.
