

**Chapter 2**  
**TA1 Report**

## TA1 Report

Naming Format: "ta1sequence#.txt"

The TA1 Report is generated based on the information received in the ISA14. Files submitted with a '0' in the ISA14 will only receive the TA1 Report when an error is detected. Files submitted with a '1' in the ISA14 will receive a TA1 Report with every transmission. Check with your software vendor to determine what is normal for your office. Envelope errors are the most common reason to receive a bad TA1 Report. These errors occur when the beginning and end of the file are not built properly. Your software vendor should help you understand how to read these reports and correct any errors.

### Example of a Successful TA1 Report

```
ISA*00*          *00*          *ZZ*ASK INC          *ZZ*0003101
*041230*1041*U*00401*000005169*0*P*::~~
TA1*000000150*041230*1150*A*000~
IEA*0*000005169~
```
