

ICD-10-CM Editing – Unspecified Trimester - BCBSKS only

Beginning 10/1/17 - The following edits will be implemented for BCBSKS claims submitted under payer ID 47163. This includes ITS, FEP and ASO claims.

PURPOSE: EDI front end edits for Institutional Inpatient claims will be implemented to encourage providers to document and specify the most appropriate code related to a condition. Some ICD-10-CM codes indicate the trimester in which the condition occurred. If an obstetrical inpatient claim is received with an unspecified trimester code, the claim will reject. Accurate coding allows BCBSKS to administer policy benefits in an efficient and effective manner.
